|-------------------|---|
| <b>OBJECTIVE</b>  | I would like to pursue a career in any computer- or technology-related field, but my main interests and course work experience are in software development and program analysis. Throughout my career, I plan to constantly learn, contribute to the field of Computer Science, and help others in any way possible.  |
| <b>EDUCATION</b>  | <p><b>University of Memphis (2011 - 2015)</b><br/><b>Degree:</b> Computer Science, B.S.<br/><b>Designation:</b> Magna Cum Laude<br/><b>Major GPA:</b> 3.720<br/><b>Cumulative GPA:</b> 3.730</p> <p><b>Bolton High School (2007 - 2011)</b><br/>Graduated with Honors</p>   |
| <b>SKILLS</b>     | <p>I am a fast learner, good team player, and an excellent listener. I pay extra attention to detail, have good customer service and organizational skills, take orders well, and become familiar with new technologies and software quickly.</p> <p><b>Programming/Technical Skill</b><br/><b>Most Experienced:</b> Java, SQL (specifically working with MySQL)<br/><b>Medium:</b> C/C++, HTML, CSS, Microsoft Word, Microsoft Excel, Unix shell/command line<br/><b>Beginner:</b> JavaScript, PHP, Prolog, ML, Ruby, Android app development<br/>(Some familiarity with several other types of programming languages)</p>   |
| <b>EXPERIENCE</b> | <p><b>Capstone Software Project 4882 (Spring 2015)</b><br/>Worked for a startup company assisting with the development of an Android app called "Uin – The Social Calendar." Collaborated with a team. Met with customer to receive software specifications and construct initial plan. Held meetings with customer and team members on a weekly basis. Adapted to changes in customer wants and needs. Contributed original ideas to the project. Managed source code repository on GitHub.</p> <p><b>Software Engineering 4081 (Fall 2014)</b><br/>Produced full stack website using Ruby on Rails for a simulated customer. Collaborated with a team. Met with customer and instructor to receive software specifications and construct a 3-part plan. Held weekly progress report and individual review meetings. Assigned team member tasks and managed source code.</p> |
